

Structure Plane

Information Architecture

The home page will be divided into two sections, search field/map and results to type and place selected.

On the menu on top, there will be links to Social Media.

Interaction Design(IXD)

- The user will find home page, where their can choose a place/city area.
- The Menu Bar on top of the page turn into a hamburger icon, as it would take less space when accessing the page through a mobile.
- The Menu bar is fixed on the top on the page at all time.
- Each button has a hover effect to change the color of it.
- Website is responsive.
- User can choose from the suggested types to refine their search.
 1. Bar
 2. Cafe
 3. Lodging
 4. Museum
 5. Night Club

6. Restaurant

7. Park

- Once the user click on one of the options listed above , markers will be automatically placed on google maps and a list with more details result will appear.
